

Reliable. Easy to Use. Accurate.

Express™

Clinician's comments

- "Putty is great — easy to mix — love it"
- "Excellent system. Low viscosity stacks well, yet flows into the sulcus with ease, resulting in great impressions"
- "Great Wettability"
- "Good system for patients with a strong gag reflex — putty stays put"

Express™ VPS Impression Material with Garant™ Dispenser — The System of Choice!

Express VPS Impression Material provides you with the reliability proven by millions of impressions made worldwide in over 20 years. Due to its various components, Express VPS impression material allows for maximum technique flexibility. You have the freedom to use either the two-step or simultaneous putty-wash technique. Due to its flow properties and hydrophilicity, Express wash materials provide excellent detail reproduction.

The new design of mixing tips allows faster and easier mixing with precise access thanks to the fine intraoral tip. Used in the putty-wash technique, the orange Express STD Putty mixes easily without streaking while the thixotropic wash materials flow freely, yet stays on your preparation without slumping.

The Garant™ Dispenser promises virtually no more plugged cartridges because of its reusable cap and an easier dispensing system. The additional advantages of this system are:

- Dual-port cartridge minimizes risk of cross contamination.
- Garant™ dispenser works with all 3M ESPE syringeable impression materials.
- Color-coded cartridges and mixing tips for easy use.
- The Garant dispenser is completely steam autoclavable.
- Smaller mixing tip reduces waste up to 35%.

New: Easier Application and Strain-Free Dispensing of Material with the Garant™ Dispenser.

Express Impression Material, the most popular VPS putty, meets ADA/ISO Specifications and was awarded with 4-Stars from the Dental Advisor.

“3M ESPE Express Material is a highly recommended addition cured silicone designed for taking crown and bridge, denture and bite registration impressions. It received a 94% rating”
Dental Advisor, Vol 16, No 6, July / August 1999 (rated + + + + 1/2)
