9007285  Enamelon® Preventive Treatment Gel
4.0 oz (113 g), Clean Mint, 12/case
Treats sensitivity

Occludes tubules with ACP & Fluoride

Enamelon® contains stannous fluoride along with calcium and phosphate ions that have proven effective for tubule occlusion. By blocking the exposed tubules with a combination of stannous (tin) ions along with fluoride, calcium and phosphate salts, a physical barrier is created that covers open dentinal tubules to prevent external stimuli from causing pain or discomfort.

Soothes dry mouth tissue

Enamelon provides an immediate and long lasting soothing, moisturizing and lubricating effect.

Through the use of proprietary co-polymers, UltraMulsion® benefits your patients by providing a long-lasting coating that lubricates and soothes the soft tissues of the mouth.

The only over-the-counter (OTC) stannous fluoride preventive treatment gel that has been shown in a clinical trial to help reduce many sensory symptoms of dry mouth.

More protection, less fluoride!

3x greater reduction of enamel solubility

Enamel Solubility Reduction FDA Method #33

Negative Control (Water) recorded a -5.45% Enamel Solubility Reduction

In-vitro testing shows that Enamelon® reduces the solubility of enamel, preventing demineralization of the tooth surface when exposed to acids, providing 3x greater protection against acid challenges.

More protection with less fluoride

Enamel Fluoride Uptake (ppm F) FDA Method #40

Enamelon® provides over 2x more beneficial fluoride with only one-fifth the amount contained in 5000 ppm fluoride toothpastes.
