Treatment
As above under First Aid.

5.0 Fire Fighting Measures

5.1 Suitable extinguishing media
Carbon dioxide, dry chemical, alcohol foam, or water fog. Water spray may be used to keep fire exposed containers cool.

5.2 Extinguishing media to avoid
Do not use direct water stream

5.3 Special exposure hazards in a fire
Heat may cause polymerization with rapid release of energy.
5.4 Special protective equipment for fire-fighters

Self-contained breathing apparatus. Cool exposed containers with water spray to prevent polymerization under fire conditions.

6.0 Accidental Release Measures

6.1 Personal precautions.

Wear safety glasses, gloves and lab coat.

6.2 Environmental precautions

Avoid releasing large amounts of uncured material into the environment. Cured / set-up material is, to our knowledge, inert.

6.3 Method for clean up

Contain spilled material. Absorb or wipe up spill with paper towels or cloths. Collect for disposal in a covered container. Wash spill area with alcohol or soap and water.

7.0 Handling and Storage

7.1 Handling

For use only by dental professionals. Follow good hygiene practices. Avoid direct/strong light sources, temperature extremes (>27°/80°F, <5°C/40°F), contamination and cross contamination. Recap immediately after use.

7.2 Storage

Store product tightly capped in original container at cool room temperature (<25°C). Avoid direct, strong light, sources of ignition and extremes of temperature. Shelf life for unopened product is two years from date of manufacture, provided that the material has been stored properly.

7.3 Specific uses

Dental restorative materials
