

REV it up!

**Only 15 minutes, once a day
to your patients' whitest smiles!**

Perfecta® REV!

Professional take-home tooth whitening

STEP 1 – REV! Gel: Patented 14% hydrogen peroxide formula delivers proven whitening results with only 15 minutes, once a day wear-time.¹ REV! gel is water-based to hydrate the teeth as it whitens and to avoid thermal sensitivity naturally.

STEP 2 – REV! Finishing Rinse: Refreshing mouth rinse is formulated for use immediately after REV! gel. Removes residual gel from teeth and any soft tissue, enhances whitening, and the alcohol-free, cool mint flavor leaves the mouth clean and refreshed after every treatment.

The Ideal Combination: Your patients will appreciate the short wear-time and the refreshing finishing rinse.

Technique Tip: Only a small bead of gel is placed in each tooth impression of the tray.

Treatment Tip: Begin whitening treatments 24-48 hours after cleaning to allow the protective pellicle layer to re-form on enamel.

Patient Pak (shown above) 4000142

Contains: 2 - 3cc syringes, 2 dispensing tips and finishing rinse, patient and doctor's instructions. Enough material for a two-week treatment.

Refresher Pak 4000141

Contains: 1 - 3cc syringe, 1 dispensing tip and finishing rinse, patient instructions. Ideal for touch-ups to avoid rebound after in-office whitening.

Call Premier Customer Service at 888-670-6100 for the availability of FREE promotional material.

Other Perfecta® Products
