MARK3 EverCem Plus

Universal Resin Cement (Automix) with MDP

EverCem Plus from MARK3 now features MDP for enhanced bonding, especially to zirconia restorations. This dual-cure, self-etch, self-adhesive resin cement eliminates separate etching, priming, and bonding steps to save chair time. It is ideal for cementing ceramic, composite, metal restorations, and posts. Its low film thickness helps ensure a closer restoration fit with excellent bond strength.

Features & Benefits

- **Contains MDP for strong, durable bond**
- Dual-cure for versatile performance
- Self-adhesive – no separate bonding agent in most cases
- Low film thickness for precise seating
- Easy automix syringe delivery
- Radiopaque for clear x-ray identification

Performance Snapshot

Compressive strength: 275–300 MPa

Flexural strength: 75–125 MPa

Shear bond strength: 28–32 MPa

Film thickness: 12 µm

Indications for Use

- All-ceramic crowns, inlays & onlays
- Metal & ceramic-metal crowns/bridges
- High-strength zirconia restorations
- Metal or fiber posts
