DENTAL SUPPLY CATALOG

NOBLE
DENTAL SUPPLIES

MISSION STATEMENT

We have been serving the global dental community since 1978. Over the last 42 years we have seen the challenge that dentists have faced in finding premium, affordable dental products. Name-brand manufacturers have become expensive, increasing the cost of their products every year regardless of the income of dental practices.

For these reasons, we have used our extensive knowledge in sourcing to bring dentists premium products across a wide range of categories that are 30-50% below the expensive name-brand products.

OUR HISTORY

1978

Our corporate office was founded in 1978 by Carol and Gus Markiet out of their home in Pomona New York.

They are well respected in the dental industry, delivering what they promise; honesty, trust and reliability.

1994

Carol and Gus Markiet's 3 children come into the business. Our focus then changed from exporting dental supplies to selling domestically across the United States and Canada.

2004

We relocated to Congers, New York to a 15,000 square foot facility to accommodate our fast growing dental supply business.

2006

We started our retail division, Dental Deals and began selling low priced, high quality dental supplies directly to dentists. In the same year the Dental Deals website was launched and our company was renamed "Dental Deals Online". Our website has brought us thousands of customers. But it is our values, instilled in us by our parents 42 years ago - honesty, trust and reliability that has kept our satisfied customers loyal.

2018

Dental Deals Online has rebranded as **Noble Dental Supplies.**

WHY THE NAME CHANGE?

Dental Deals Online was always a promise to our customers more than a classic brand name: fantastic deals on dental supplies for dentists nationwide.

Online commerce has matured over the last decade, and we thought it was time to modernize our brand presence as well. So instead of a descriptive but impersonal name for our business, we updated our name to Noble Dental Supplies to reflect our family-driven integrity.

Amalgam

Spherodon-M® Admix Alloy 45.5% Ag (Silver), High Copper, Non Gamma II

A spherical lathe cut blended amalgam alloy (type III) that provides excellent stability, enhanced corrosion resistance and reduced ditching.

FEATURES

- Outstanding dimensional stability
- Improved marginal integrity
- More body & easy condensation versatility
- Reduced risk of fracture
- High corrosion resistance

PHYSICAL PROPERTIES

- Composition Ag 45.5%, Sn 31.5%, Cu 23%
- Particle shape 40% Lathe cut 60% spherical
- Average Creep (7 days) 0.35%
- Average Dimensional Change +0.08%
- Average Comprehensive Strength (1 hr) 178 MPa
- Average Comprehensive Strength (24 hr) 460 MPa

Spherodon+® Spherical Alloy 60% Ag (Silver), High Copper, Non Gamma II

A single composition, ultra-fine spherical ternary. This formulation utilizes modern resin technology that offers unique dimensional stability and resistance to corrosion. Exhibits high comprehensive strength due to its unique formulation. This is achieved by spraying inert nitrogen under high pressure to produce a fine spherical powder.

FEATURES

- 100% spherical particles
- Decreases micro leakage
- Superb compressive & tensile strength
- Easy handling & smooth carving
- Extra low mercury alloy ratio

PHYSICAL PROPERTIES

- Composition Ag 60%, Sn 28%, Cu 12%
- Particle shape 100% spherical
- Average Creep (7 days) 0.62%
- Average Dimensional Change +0.01%
- Average Comprehensive Strength (1 hr) 171 MPa

Nogama® Dispersed Phase Alloy 69.5% Ag (Silver), High Copper, Non Gamma II

An admix of spherical, copper-silver eutectic particles and lathe-cut conventional alloy. It has a high compressive strength that minimizes the risk of restoration fracture.

FEATURES

- Provides a firm pack & smooth carving
- Increased strength of restored teeth
- Supreme marginal adaptability
- Corrosion resistant
- Excellent durability

PHYSICAL PROPERTIES

- Composition Ag 69.5%, Sn 19.5%, Cu 10.5%, Zn 0.5%

EDTA Solution 17%

100-5971 **\$9.75** 4 oz. (120mL)

100-5972 **\$25.59** 17 oz. (500mL)

- An effective calcium binding or chelating agent.
- Used to facilitate instrumentation of root canals and for smear layer removal.
- Decalcifies canal walls making it easier to enlarge and shape the canal with files and reamers.

Sodium Hypochlorite Solution 6%

100-5974 **\$13.29** 17 oz. (500mL)

- Most commonly used solution in root canal treatments.
- Used as an irrigation solution, for debridement and as a canal disinfectant during and after instrumentation.
- Contains highly effective antimicrobial properties.

One of the most powerful air-driven handpieces on the market, with up to 25 watts of torque. It is designed to handle up to 60 PSI of air pressure. Innovative built-in micro-generator eliminates the need for a fiber optic system from a dental delivery. Direct-LED+provides larger and brighter light pattern and Triple Water Spray avoids overheating.
Warranty - 1 year.

A True Leader in Highspeed Handpiece Technology

AirLight® M800 Plus HIGH SPEED HANDPIECE *Direct LED Without Fiber Optics*

- No Light Bulb
 - No Fiber Optic Tubing
 - No Electrical Source
- Just brilliantly bright illumination!*

KEY FEATURES

Ceramic Ball Bearings

Superior torque and long lifespan. Specially designed for smooth and quiet operation.

Triple Water Spray

Effectively cools the entire surface of the bur to prevent overheating, resulting in greater patient comfort.

Direct-LED

The LED is optimally positioned on the face of the handpiece to generate a larger light pattern than a traditional fiber optic system.

Titanium Surface

Solid titanium construction that is built to last. Micro-textured and scratch-proof surface lowers the possibility of slippage.

Generator

An innovative micro-generator producing electricity for the LED is built into the handpiece. This eliminates the need for a fiber-optic system.

Compatibility

Compatible with a great variety of coupling systems and adapts well to every existing treatment unit.

"It was very light and easy to maneuver...." - Dr. Frank Kuzmin

HANDPIECE REPAIR

Slow Speed Motor Repairs

Bearing Replacement, Rotor Blades, "O" Ring Replacement, Gears, Pins, Drive Rings, Cleaning, Adjustments, Rethread Backends

High Speed Repairs

Cleaning, Bearing Replacement, "O" Ring Replacement, Balancing, Testing, Clearing Water Lines, Fiber Optic Replacement, Repairing Dented Heads

NoseCone & Angle Repairs

Bearing Replacement, Chuck, Gears, Pins, Springs, Cartridges, Latches & Screws, Dog Drives, Spindle, "O" Rings

What We Repair

All High-speed, Low-speed, Electric and Surgical Handpieces
All Manufacturers (Star, KaVo, NSK, Midwest, including generic and house brands)

Repair Time

We offer a 48 hour turnaround time on most repairs.

Cost

Repairs are 30-40% less expensive than sending the unit back to the manufacturer for repair.

Warranty on Repair

All repairs come with a 3-6 month warranty depending on the service needed.

Process

Fill out the repair workorder. Then we will pick up your broken handpiece by sending a UPS call tag. Upon receipt, we will provide an estimate with 24hours. If the work order is confirmed, the handpiece will be repaired immediately and sent back with 48 hours of initial receipt.

Repair & Replacement Parts

We are fully stocked of replacement parts for most handpieces to ensure repairs are complete as soon as possible.

All systems operate @43KHz. Systems available with international voltages.

DemeTECH SUTURES

Chromic Gut Sutures

DemeTech's Chromic Catgut suture is an absorbable, sterile, surgical suture composed of highly purified connective tissue (mostly collagen) derived from either beef or sheep intestines. DemeTech's Chromic Catgut is treated with chromium salt solution to resist body enzymes, thereby prolonging the absorption time to over 90 days. This chromic covering not only prolongs the strand's integrity, but also minimizes tissue irritation, causing less internal reaction. The percentage of collagen in the catgut suture often determines the quality of the suture. Higher percentages of collagen allow for: superior tensile strength, longer absorption times, and lower reactions in vivo.

- DemeTech manufactures its Chromic Catgut sutures with the highest quality collagen, maintaining a composition of 97%-98% of pure collagen.
- DemeTech's Chromic Catgut sutures are covered in chromic salt to prolong integrity, minimize tissue reactivity, and minimize the chance of adverse reactions.
- Tensile strength is retained for up to 14 days, and sometimes as long as 21 days.
- Allows for smooth passage through tissue.
- Easy knot tying characteristics
- DemeTech's new technology of chromicizing strands minimizes the possibility of fraying and maximizes the potential and integrity of its Chromic Catgut.

PGA (Polyglycolic Acid) Coated Sutures

The Polyglycolic Acid suture is a synthetic, absorbable, sterile, surgical suture composed of 100% glycolide. The chemical formula of DemeTech's PGA is (C₂H₂O₂)_n. Clinical trials have shown that after two weeks, approximately 84% of DemeTech's PGA initial strength remained. At four weeks, approximately 23% of DemeTech's PGA linear tensile strength remained. Polyglycolic Acid Sutures have been found to be nonantigenic and elicit only mild tissue reactivity during the absorption process.

- Polyglycolic Acid, better known as PGA, is composed of polymers of glycolide acids.
- DemeTech's PGA is coated to allow for easier passage through tissues with only minimal drag.
- Coated PGA sutures facilitate:
 - Easy tissue passage
 - Precise knot placement
 - Smooth tie down
 - A decreased tendency to irritate tissue
 - Greater tensile strength

COMPARE TO LOOK

Plain Gut Sutures

DemeTech's Plain Catgut suture is an absorbable, sterile, surgical suture composed of highly purified connective tissue (mostly collagen) derived from either beef or sheep intestines. Due to an extremely short absorption period, DemeTech's Plain Catgut elicits only minimal reaction in tissues. The percentage of collagen in the catgut suture often determines the quality of the suture. Higher percentages of collagen allow for: superior tensile strength, longer absorption times, and lower reactions in vivo.

- DemeTech manufactures its Chromic Catgut sutures with the highest quality collagen, maintaining a composition of 97%-98% of pure collagen.
- DemeTech's Plain Catgut is rapidly absorbed.
- Tensile Strength is maintained for about 10 days.
- Absorption is complete within 70 days.
- DemeTech's Plain Catgut is ideal for tissues which heal rapidly and require minimal support

Silk Sutures

DemeTech's Silk suture is a non-absorbable, sterile, surgical suture composed of an organic protein called fibroin. These silk sutures are processed to remove the natural waxes and gums from its origin. As Silk is a natural fiber, it does illicit an acute inflammatory reaction, which is followed by gradual encapsulation of the suture by fibrous connective tissue (occurring usually in 14-21 days). While DemeTech's silk sutures are not considered absorbable sutures, progressive degradation of its fibers results in the gradual loss of tensile strength within the first year. The silk sutures are indicated for use in general soft tissue approximation and/or ligation.

- Raw silk is produced by a silkworm larva's cocoon. These natural waxes and gums are removed prior to the braiding process, allowing for a tighter, more compact braid.
- DemeTech's Silk suture is dyed black for easier visibility in tissue.
- DemeTech's Silk suture is non-absorbable and multifilament in nature.
- Although DemeTech classifies its silk suture as a non-absorbable suture, it loses most of its tensile strength in one year, and is completely absorbed in 2 years. Thus, DemeTech's Silk behaves like a very slow absorbing suture.
- DemeTech coats its Silk in silicon to limit absorption, increase ductility, and minimize tissue reactivity.

TERMS & CONDITIONS

Noble Dental Supplies is dedicated to providing quality brands at the best prices. While we strive to maintain the present prices in our catalog, we reserve the right to adjust them in accordance with manufacturer's increases without prior notice. We are not responsible for typographical errors.

Payment Methods:

Your orders can be paid via Mastercard, American Express, Visa, PayPal, or COD. COD checks should be made out to Noble Dental Supplies. We do not offer deferred payment terms.

Delivery Terms:

Continental U.S. - All orders are subject to a handling charge. This charge includes freight, except for additional carrier charges related to special delivery services and hazardous material shipments.

Outside the Continental U.S. - Standard UPS charges will apply. Any additional charges will be the responsibility of the recipient.

Controlled Substances:

Regulations allow us to sell controlled substances to registered, licensed healthcare professionals only. If you have recently changed your address or are a new customer, please supply us with a copy of your state registration. Mail, email or fax a copy of your DEA certificate.

Mail: Noble Dental Supplies
135 North Route 9W, Congers, New York 10920

Email: anthonyt@nobledentalsupplies.com

Fax: 845-510-3191

Returns:

PRIOR AUTHORIZATION IS NEEDED FOR RETURNS. Simply contact our Customer Service Department to arrange for a return. Please comply with the following conditions:

- Returns must be accompanied by a copy of your invoice and a reason for the return.
- All returns must come back in their original, unmarked packaging.
- Returns must have been purchased within the previous 30 days. Any returns over 30 days are subject to a restocking fee.
- Shortages or errors in shipments must be reported within 7 days of the invoice date to receive credit.
- Shipping charges apply on all returns.

SATISFACTION GUARANTEED

If the product you have ordered is defective or does not perform to satisfaction, you may choose to receive a credit, exchange or refund.
